Discussion Questions:

1. As you completed the report card for the Bay in 1600, what habitat or animal do you think was most critical to the overall health of the Bay?

2. How do you think that the water conditions have changed since that time?

3. What do you think are the causes of the changes in water quality from 1600 to now?

4. What grade do you predict the Chesapeake Bay will have in 10 years? Why?

5. Why should we care about water quality in the Bay?
